Fax: 410-745-3517

Since 1972, celebrating over thirty-five years of concern for wetlands.

Environmental Concern Inc

Bring Wetlands Alive With WOW! and POW!

Set Up A Course, It's Easy

Partner Benefits

- Increased outreach to local educator community
- Featured as a partner on Environmental Concern's website
- Two complimentary spaces in the workshop
- Member of national WOW!/POW! network

Partner Responsibilities

- Select a date.
- Secure the course location.
- Help recruit participants.
(minimum 10-12/ maximum 20-25)
Environmental Concern will provide a flyer for distribution.
- Set up classroom with necessary A/V equipment.

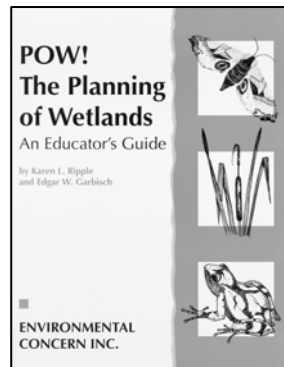

Contact the Education Department for more information:

POW! THE PLANNING OF WETLANDS

Learn how to build a schoolyard wetland with your students with POW! The Planning of Wetlands: 1, or 2-day workshops for formal and non-formal educators.

Using POW! a class of students decided to build a home. They didn't use planks of wood, hammers or nails. Instead they used aquatic plants and shovels to create a home for wildlife, a home called a wetland. While creating this vital resource, students gained life skills, reinforced concepts learned in school and felt empowered by making a positive difference in their community.

POW!'s 25 activities allow the students to transform their schoolyard into a living and breathing wetland. Together, they will survey the school's grounds, apply for necessary permits, develop a water budget, design the wetland, choose native plants, and build the wetland.

WOW! THE WONDERS OF WETLANDS

Bring wetlands into the classroom with WOW! The Wonders of Wetlands: 1-day workshop for K-12 formal and non-formal educators.

Educators respond to WOW! because it fulfills their need for a single resource, is highly adaptable to all subjects and all ages and its activities are easy, fun and inexpensive. The 1-day workshop introduces educators to the three parameters of wetlands (vegetation, soils, hydrology) and wetland functions and values through the activities – for instance...

- Explore a watershed model using a paint pan
- Assemble a dip net with a kitchen sieve and a broom handle
- Get kids' hearts racing with a nutrient tag game
- Explore urban planning with hydropoly and regulation rummy
- Reinforce the concept of metaphors with a pillow case
- Dissect a cattail
- Study soil percolation rates with a coffee tin and kitty litter
